Record Table with On Page Edit

This is a table for editing a single record out of a collection.

Check the following functions work

- Tree View Select drop down is staggered
- Link is read only
- Placeholders
- Entering text copies it to textarea == problem input looses focus because the table is re-written.... I should only update the value
- row number and row checkbox do not show up
- Input changed logs the table as a string

Make Table Writable
